

# GENERIC INSTALLATION GUIDE FOR ALL MODELS WITH CHANGE CATCHERS

## OPTION 1/2

Dear Customer;

Thank you for purchasing what is known to be the best automobile seat covers in the industry! As we are unable to assist you in installing your Wet Okole Hawaii waterproof sport seat covers, we offer these special instructions. Most vehicle installations are self explanatory. In the case of any problems or concerns please feel free to call for technical support at our toll-free number (888)246-5653. Enjoy your Wet Okole Hawaii Seat covers and thank you for your business!

In a vast variety of vehicles a small modification must be made to the existing change catcher in order to install our seat covers properly. The change catcher is located on the backside bottom section of the seat back (the part you lean against). The change catcher is a piece of material that attaches from the backrest to underneath the seat bottom which blocks the passage that is required for seat covers to be installed. **IMPORTANT** The first option of this installation sheet allows you to utilize our seat covers without voiding your manufactures warranty, the second option does not.

### STEP 1

Pull seat cover over and into the seat back

### STEP 2

Pull flap up temporarily

### STEP 3

Detach change catcher

### STEP 4

Bend and insert the change catcher under and into the seat back between the stock material and the neoprene seat cover

### STEP 5

Follow up to step 4

### STEP 6

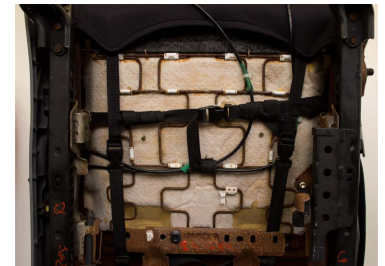

Install seat bottom cover starting from the front of the seat to the back

### STEP 7

Rear view of seat bottom cover installation

### STEP 8

Engage buckles under the seat to keep the seat bottom cover in place.

### STEP 9

Attach both ends of velcro from the seat back together.

### STEP 10

Follow up to step 9

### FINAL STEP

Pull flap down and under the seat and attach hooks to secure the flap to the seat bottom.

### IMPORTANT

→ Hooks can be attached anywhere that will not interfere with the operation of the seats.
